

Allergic Bronchopulmonary Aspergillosis (ABPA) panel 2

Order Name: **ABPA 2**

Test Number: 5509225

Revision Date: 02/18/2025

TEST NAME	METHODOLOGY	LOINC CODE
Allergic Bronchopulmonary Aspergillosis (ABPA) panel 2		

SPECIMEN REQUIREMENTS				
Specimen	Specimen Volume (mL)	Specimen Type	Specimen Container	Transport Environment
Preferred	1 mL	Serum	Clot Activator SST	Room Temperature
Instructions	<p><b>Specimen Type:</b> Gel-barrier tube</p> <p><b>Specimen Storage:</b> Maintain specimen at room temperature</p> <p><b>Specimen Collection:</b> Not Available</p> <p><b>Special Instructions:</b> Testing referred to Eurofins Viracor LLC EURKS#403016</p>			

GENERAL INFORMATION	
Expected TAT	3-5 business days from receipt of specimen at performing lab
Clinical Use	ABPA is a hypersensitivity disease of the lungs caused by Aspergillus fumigatus. It is an important complication for patients with asthma and cystic fibrosis. The ABPA 2 panel is the same as the basic ABPA panel with the addition of Aspergillus Precipitins. Recent reports have emphasized the importance of both the precipitin and quantitative IgG test for Aspergillus-specific antibodies.
Performing Labcorp Test Code	806262
CPT Code(s)	86331, 86003, 82785, 86001
