Neuromyelitis Optica (NMO) Antibody (Aquaporin-4 Receptor)

Order Name: NMO AB
Test Number: 3805377
Revision Date: 06/30/2023

TEST NAME			METHODOLOGY	LOINC CODE
Neuromyelitis Optica (NMO) Antibody (Aquaporin-4 Receptor)			Enzyme-Linked Immunosorbent Assay (ELISA)	68548-7
SPECIMEN REQUI	IREMENTS			
Specimen	Specimen Volume (min)	Specimen Type	Specimen Container	Transport Environment
Preferred	1 mL (0.2 mL)	Serum	Clot Activator SST	Refrigerated
Instructions	Specimen Type: Red-top tube Specimen Storage: Refrigera Specimen Collection: If a red Specimen Stability: Ambient:	te I-top tube is used, transfer s	separated serum to a plastic transport tube. days, Frozen: 14 days	

GENERAL INFORMATION			
Expected TAT	3 - 5 days		
Clinical Use	Approximately 75 percent of patients with neuromyelitis optica (NMO) express antibodies to the aquaporin-4 (AQP4) receptor. Diagnosis of NMO requires the presence of longitudinally extensive acute myelitis (lesions extending over 3 or more vertebral segments) and optic neuritis. While absence of antibodies to the AQP4 receptor does not rule out the diagnosis of NMO, presence of this antibody is diagnostic for NMO.
