GENERAL INFORMATION

Expected TAT	5-10 Days
Clinical Use	Synthetic cannabinoids refer to a wide variety of herbal mixtures that produce experiences similar to marijuana (cannabis) that are marketed as legal alternatives to that drug. Sold under names, including "K2," "Fake Weed," "Yucatan Fire," "Skunk," "Moon Rocks," and "Spice," they are labeled "not for human consumption." Synthetic cannabinoids are psychoactive designer drugs made with dried, shredded plant materials and chemical additives that induce psychoactive effects.
