

Inflammatory Bowel Disease Panel (Crohn's disease)

Order Name: **IBD PANEL**
 Test Number: 2905565
 Revision Date: 10/01/2022

TEST NAME	METHODOLOGY	LOINC CODE
Anti-Neutrophil Cytoplasmic Antibody (ANCA)		
Saccharomyces cerevisiae Antibodies (ASCA) (IgA, IgG)		

SPECIMEN REQUIREMENTS				
Specimen	Specimen Volume (min)	Specimen Type	Specimen Container	Transport Environment
Preferred	3 mL (1)	Serum	Clot Activator SST	Refrigerated

GENERAL INFORMATION	
Testing Schedule	Assay Dependant
Expected TAT	5-7 Days
Clinical Use	The Inflammatory Bowel Disease Differentiation Panel is useful in diagnosing patients with Crohn's disease. The Panel includes Antibodies against Saccharomyces cerevisiae (Baker's yeast) that are detected in approximately half of patients with Crohn's disease.
