

## Flow Cytometry on Tissue Biopsy

Order Name: **FLOW TISS**

Test Number: 8090065

Revision Date: 07/06/2022

TEST NAME	METHODOLOGY	LOINC CODE
Flow Cytometry on Tissue Biopsy	Flow cytometry	

### SPECIMEN REQUIREMENTS

Specimen	Specimen Volume (min)	Specimen Type	Specimen Container	Transport Environment
Preferred	5x5mm	Tissue	Sterile Container with RPMI Solution	Refrigerated
Alternate 1	5x5mm	Tissue	Sterile Container with Saline	Refrigerated
Instructions	<p>Place a minimum of a 5x5mm tissue sample in a sterile screwtop container with RPMI. Keep specimen Refrigerated. Indicate type of tissue on specimen and requisition. Please deliver to performing laboratory department (flow cytometry) ASAP. <b>DO NOT Place Tissue Into a Fixative Solution.</b> Specimen stability: 48hrs refrigerated</p>			

### GENERAL INFORMATION

Testing Schedule	Tue-Sat
Expected TAT	2 Days
CPT Code(s)	Test Dependent
Lab Section	Flow Cytometry
