

Litholink 24Hr Urine Panel

Order Name: **Litholink U24**
Test Number: 5195179
Revision Date: 12/18/2023

TEST NAME	METHODOLOGY	LOINC CODE
Litholink 24Hr Urine Panel	See Test Notes	

SPECIMEN REQUIREMENTS

Specimen	Specimen Volume (min)	Specimen Type	Specimen Container	Transport Environment
Preferred	50 mL (of 24-hour urine)	Urine, 24-hour	Litholink 24 Hour Urine Collection Kit	Room Temperature
Instructions	Litholink 24 Hour Urine Collection Kit required for specimen collection. Specimen: 24 hour urine Volume: 50 mL of 24-hour urine Container: 24 Hour Urine Container, Litholink 24-hour Collection Kit Collection: Full 24-hour collection: void and discard first urine and continue to collect for 24-hour period from that void time. Storage Instructions: Room temperature with preservative- DO NOT refrigerate			

GENERAL INFORMATION

Expected TAT	5-9 Days
Clinical Use	Treatment and management of patient population who have Kidney Stone disease
Performing Labcorp Test Code	911325
Notes	Methodology: Calcium, Magnesium, Creatinine, Oxalate, Citrate, Uric Acid, Urea Nitrogen, Phosphorus ammonium, and cystine screening: Colorimetric Sulfate: Turbidity with barium precipitation Sodium, Potassium, Chloride: Fluoride for urine volume - Ion specific electrode pH: Potentiometry.
